

REQUEST FOR QUOTES

Unmanned Aerial Vehicle Larvicide Treatment of Bradley Woods

Date Issued: October 20, 2025

Proposal overview

CCBH is accepting proposals for drone or unmanned aerial vehicle (UAV) application of an area metropark system using a mosquito granular larvicide treatment. Several areas of various acreage in the Bradley Woods Metropark will be treated in April 2026 to prevent the single brood hatch off of Aedes mosquitos in woodland pools. The pools are located in an established wooded area (mature maples, oaks, etc.) with limited road access. The topography is very flat in the proposed treatment area.

Vendor requirements

- Total treatment area is approximately 250 acres
- Altosid SBG II will be provided by CCBH
- An application rate of 6-7 pounds per acre is required
- The selected vendor must provide a 50' boom lift to assist with line-of-sight requirement of the drone
- The selected vendor will be required to take care of all necessary licensing, permitting and insurance for the treatment, including Ohio Department of Agriculture, Federal Aviation Administration and Cleveland Metroparks (pre-authorization required for drone use), as well as any other local, state, and federal requirements.

Due Date: Quotes must be submitted by 10 a.m. on Tuesday November 4, 2025.

No full size tractor trailers are permitted on CCBH property.
