CUYAHOGA COUNTY BOARD OF HEALTH

Your Trusted Source For Public Health Information

The Cuyahoga County Board of Health (CCBH) is actively monitoring respiratory illness trends as we enter the 2026–2027 respiratory season, which spans from October 4, 2026 through May 22, 2027. This period typically sees increased activity of respiratory viruses, including COVID-19, Influenza, and Respiratory Syncytial Virus (RSV). Through ongoing surveillance and data reporting, CCBH aims to support partners and stakeholders with timely, actionable insights to inform public health response and community preparedness.

The respiratory illness surveillance dashboard has been updated for MMWR week 40 (October 4-10, 2026). Please visit https://ccbh.net/respiratory-webpage-dashboard/ for the most current data and trends.

Below are some key points for MMWR week 40 (October 4-10, 2026):

COVID-19

- 7 COVID-19-associated hospitalizations were reported this week.
- 0 COVID-19 related deaths were reported this week by the Ohio Department of Health Vital Statistics.
- CCBH is not investigating any COVID-19 outbreaks.
- Wastewater monitoring data suggest viral gene copy concentration levels were low at NEORSD Easterly, Southerly, and Westerly WWTCs (Ohio Wastewater Monitoring Data | DataOhio).

Influenza

- 2 Influenza-associated hospitalizations (IAHs) were reported this week.
- 0 Influenza related deaths were reported this week by the Ohio Department of Health Vital Statistics.
- 1.7% of emergency department visits were for flu like symptoms. ED visits for fever/ILI were below the 5 year median and considered '**low**' this week.
- CCBH is not investigating any Influenza outbreaks.
- Wastewater monitoring data suggest viral gene copy concentration levels were low at NEORSD Easterly and Southerly WWTCs and not detected at NEORSD Westerly WWTC (Ohio Wastewater Monitoring Data | DataOhio).

RSV

- 1 RSV-associated hospitalization was reported this week.
- 0 RSV related deaths were reported this week by the Ohio Department of Health Vital Statistics.
- CCBH is not investigating any RSV outbreaks.

- Wastewater monitoring data suggest viral gene copy concentration levels were not detected at NEORSD Easterly, Southerly, and Westerly WWTCs (Ohio Wastewater Monitoring Data | DataOhio).

Of note, this is the first report for the 2026-27 respiratory season.
